SUPPLEMENT TO
REPORT NO.

THIS IS UNEVALUATED INFORMATION

1. Since 1946 there has been in the Central Institute for Bacteriology a Soviet colonel who does not wear a uniform and who is reported to be an expert bacteriologist.
2. In 1947 this colonel ordered the contamination of several wells in the vicinity of Pisek (N50/Q69) and Bratislava. A bacillus of the Botulinus group was used in these tests which were very effective. Twenty-two thermite plates and approximately two cwt. (one matrical cent) of chlorine were used to counteract the effects of the tests after which the wells were filled in.
3. A considerable cultivation of the bacilli Botulinus, X.Y. 13 and Psykatozis has been undertaken with "very satisfactory results".
